DETAILED ACTION

This Application has been examined. The claims 1-8 are pending. The examination results are as following.

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claim 1 recites the limitation "the opening" in line 5. There is insufficient antecedent basis for this limitation in the claim.
- 3. Claim 1 recites the limitation "said pointing device" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Objections

4. Claims 2-8 are objected to because of the following informalities: because "The pointing device" should be --The wireless input device --. Appropriate correction is required.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2677

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sasselli et al. (US 6,411,281) in view of Derocher et al. (US 6,476,795).

Regarding claim 1, Sasselli et al. discloses in fig. 1, a wireless pointing device, comprising a body having an opening (18); and a power supply module (see battery 22 cover 26, and cavities 24); wherein the power-supply module is arranged to carry at least one battery (22); to be inserted into the opening in order to supply power from the battery to the pointing device.

However, Sassalli et al. does not disclose the power-supply module is drawn out from the opening for replacement of the battery.

Derocher et al. discloses in figs. 1-3 and 5, a power-supply module (see module 30 includes reserve battery 36, reserve charger 34, and module 30 is placed in accessory bay 26 of computer 10, see col. 4, lines 47-52) is drawn out from the opening for replacement of the battery (see fig. 2, col. 3, lines 52-55).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to implement the power-supply module is drawn out from opening for replacement of the battery as taught by Derocher et al. into the system of Sassalli et al. because this would provide to the user to replace the battery in case of failure (see col. 3, lines 52-53)

Regarding claim 2, Sasselli discloses further the body has a circuit board (52), and at least a metal plate (see spring 30, fig. 1) extending form the circuit board for electrically contacting the batteries.

Art Unit: 2677

Regarding claim 3, Sasselli et al. discloses the power-supply module has an obvious carrier for containing the battery as discussed above; each of side of he carrier having flange, and correspondingly each side of the opening having a groove (see 24 contains battery 22) for receiving flange.

Regarding claim 4, Sasselli et al. discloses the power supply module is fixed to the body by a fixing device (fig. 1).

Regarding claim 5, Sasselli et al. discloses the fixing device includes a hook (38, fig. 3) located on the body, and a recess correspondingly located on the power-supply module (fig. 1).

Regarding claim 6, Sasselli et al. discloses the pointing device is a computer mouse (fig. 1).

Regarding claims 7-8, Sasselli et al. discloses the pointing device is a wireless input device (see cordless mouse, see abstract) and could be a game controller.

Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimnhung Nguyen whose telephone number is (571) 272-7698. The examiner can normally be reached on MON-FRI, FROM 8:30 AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amr Awad can be reached on (571) 272-7764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
